

# DRUM HEATING CABINETS

## Electric Temperature Control Options

### STANDARD TEMPERATURE CONTROL SYSTEM:

- Digital process and high limit controllers with real-time temperature displays
- Allows for quick adjustment of operating temperature at the control panel
- Redundant high limit controller and thermocouple protects equipment and product from being overheated
- Overshoot is virtually eliminated through a patented fuzzy logic algorithm and auto tune feature
- Full voltage lockable disconnect
- Available in NEMA 12 Indoor and NEMA 3 Outdoor rated enclosures
- Numerous control options available
