

## MACHINE OPERATOR – 2<sup>nd</sup> SHIFT

We have an immediate opportunities available in Sandusky, OH for a Machine Operator on our *2nd shift* team (*3:15 pm-11:45 pm*). These positions either are involved in the cutting of steel parts to for rollers, the formation of parts to make a roller, or putting together or installing rollers in to steel frames.

### KEY DUTIES:

- Able to read calibration equipment.
- Able to read tape measure within 1/16 inch as well as metric version measures and can perform appropriate conversions to either standard or metric measure format.
- Able to operate small manufacturing equipment (saws, drills, cutting equipment).
- Perform quality checks as established.
- Interact with all levels of management including engineering with respect to problem-solving.
- Perform other plant operations-related duties as assigned.

The ideal candidate will have a High School Diploma/GED. A minimum of one year recent work experience in the manufacturing environment required, with steel fabrication environment experience a plus. A proven record of excellent attendance and reliability. A high level of hand to eye coordination and understanding mechanical drawings is key. The successful candidate will have strong communication, problem-solving/troubleshooting, and mathematic skills; as well as a high level of attention to detail, quality, and safety.
